

## N7590 CABINET

Biotec introduces the slim line series of cabinets for the modern orthodontic practice. These high-quality systems provide efficient and attractive additions to the busy orthodontic practice. The slim design saves valuable space while the handpiece retraction system provides a clean look free of tangled handpiece tubings.

This versatile treatment module provides enough storage to create a complete self-standing individual work station. The convenience to treat patients all day without the need of replenishing materials increases efficiency.

The cabinet's ability to accommodate computer systems of all types gives the operator access to patient records and provide complete care in an efficient manner.
