

ROYAL PD2

Royal's PD2 Pedodontic chair is identical to the GP2, except it incorporates a 4" shorter toe board and flatter seat cushion. These modifications facilitate a smaller patient by providing a flatter contour when reclined in the supine position. The PD2 incorporates a slim back to facilitate positioning and healthy ergonomics for the dental professional. The PD2 provides the convenience of electro-mechanical height and recline adjustment.

Royal®

PD2 SPECIALTY CHAIR

PEDO
