

PROMA A6210

Proma has a long history of innovation in dental delivery systems. Proma was the first to introduce a patient water system, pinch technology for controlling the flow of hand piece air and water, and an ambidextrous delivery of doctor and assistant's instrumentation.

All Proma delivery systems contain a unique piston valve control system that carries a life time warranty against failure. Proma's dependability is key to productivity and efficiency in the dental treatment room.
