

PROMA A6622

Proma has a long history of innovation in dental delivery systems. Proma was the first to introduce a patient water system, pinch technology for controlling the flow of hand piece air and water, and an ambidextrous delivery of doctor and assistant's instrumentation.

All Proma delivery systems contain a unique piston valve control system that carries a life time warranty against failure. Proma's dependability is key to productivity and efficiency in the dental treatment room.

Proma

A6622 MOBILE / HYGIENE

Designed to move freely throughout the treatment room. Proma mobiles solve operatory issues of flexibility, limited space, or right/left-hand conflicts.
